ABSTRACT SAMPLE TO SHOW STYLE

THE EMERGING TECHNOLOGIES FOR TEACHING AND LEARNING IN MEDICAL EDUCATION

Roberto Angioli, Ph.D. Department of Nephrology, The University Medical Center, University of Alaska.

SPEAKER’S CREDENTIALS: Dr. Angioli is a leader at his University in implementing the technology in his teaching. He has published numerous articles and presented his experiences at various conferences.

OBJECTIVES: The session explores emerging technologies and their integration into teaching and learning in medical education. It will try to show the possible modes of delivery of courses to students who study “traditionally” and “at distance.

TEACHING METHODS: The session will be conducted as an overview with presentations of examples dealing with already well implemented and proven methods in using technology in learning. Dr. Angioli will also accept questions and moderate discussions among the participants.

CONTENT OVERVIEW: The content of this workshop is divided into several parts corresponding to different methods used in the delivery of the courses. Each part explores the method and is followed by a discussion.

PROJECTED IMPACT: It is anticipated that the participants of this workshop will leave with easy-to-implement ideas in their teaching.
